## Connecting to the Reader

1. Download the mobile app from the [Apple App Store](#)
2. Once the app is downloaded, open it and login with your merchant login credentials. You can even use the Touch ID function for faster login.
3. Turn your mobile reader on by pressing the on button on the side.
4. In the app, select the three stripe menu on the top left hand corner
5. Turn on the “Card Reader” capability and make sure the name of the read appears in the setting.
6. Once verified, click the orange check mark at the bottom of the screen.

## Status Light

Light	Meaning
None	Reader is off.
Steady green light	Reader is paired. It will enter standby mode after 30 seconds.
Flashing green light every 1 sec	Reader is powered on and ready to connect to iOS device. If no connection is made, the reader will turn off after 5 mins.
Red light on	Battery is charging.
Red light flashing	Battery is low.

## Processing a Payment

1. Return to the main transaction screen by clicking the return arrow at the top left hand corner.
2. To start the payment transaction, type in the amount you are charging the customer and select the checkmark.
3. The screen will instruct to swipe the card.
4. The payment will be processed.
5. The customer will sign for the transaction.
6. Once payment is complete, the customer can receive either receipt by either text message or email.
